

Our Industrial Means

- The global “machines-park” corresponds to the required market needs :
 - Cut (laser, plasma,...)
 - Shaping (bending, rolling,...)
 - Assembly parts (manual and automated welding)
 - Metrology
 - etc...
- An engineering department well-equipped with advances engineering software (CATIA, SOLIDWORK, AUTOCAD...)
- The development and the knowledge of various technologies, that are at once additional and specific, allow us to realise your pieces or complete subsets.

Manufacturing costs optimization...

Quality improvement...

Know-how to satisfy your needs...

Tra-C Industrie offers you its experience and skills.
